-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 3748

Claims 1-12 are objected to because on line 7, the word "whith" is misspelled.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 7-9, the phrase "with enlarging the volume of the second stage ... concurrently with the second stage volume decreasing" is vague and indefinite because it's unclear if the second stage volume is increasing or decreasing.

In claim 7, line 7, it's unclear the phrase inside parentheses is part of the claim or not.

Claims 2, 5-6, 9, fails to further the limitation of the independent claims.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-4, 7-8, 10-12, are rejected under 35 U.S.C. 102(b) as being anticipated by US 6543411 (Raab et al).

Raab et al discloses a four-stroke internal combustion engine that the claimed invention reads on. The intake stroke in figure 1a is equivalent with the first stage with large volume. The compression stroke in figure 1b is equivalent with the second stage with decreasing volume. The ignition takes place is equivalent with the third stage. The

power stroke is equivalent with the fourth stage with small volume. The exhaust stroke is equivalent with the fifth stage with large volume.

Regarding claims 3-4, 12, Raab et al teaches it's well known to use compression cooling and expansion cooling equivalent to the claimed cooling steps.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-3, 9, are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 6543411 (Raab). Raab discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose the eliminating steps as claimed. However, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify the internal combustion engine to have different strokes (from 2 to 8 strokes are well known in the art) in Raab as claimed for the purpose of achieving appropriate power output.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schmitz, Ward, Hu, and Newman disclose engines with different stages.
